

DIVISION OF REFERENCE STANDARDS & SAMPLES (DRS)

ORIGIN OF GOODS

Benzanilide

International Standards for Antibiotics (ISAs) are primary standards intended to establish national/regional secondary standards. ISAs should not be used as working standards in routine assays as they are produced in a limited quantity. Existing well-established secondary standards, which fulfil your requirements (activities/potencies expressed in IUs, etc...) such as regional, national or in house standards, should be used as working standards.

Purpose of Material: this shipment contains drug samples for investigational use only and is intended solely for laboratory testing in vitro.

NOT FOR FOOD

NOT FOR HUMAN CONSUMPTION

FOR LABORATORY USE ONLY

I give you the origin for the following substance:

Code catalogue	Batch number	Origin
Y0001016	1.0	Synthetic

A adopter

Best regards,

Dr. Fanny MOUTIER-GAME
Head of Dispatching Section
Division of Reference Standards and Samples
